

Accessories

Scorpion Oceanics supply many items used in the termination and handling of underwater cables, connectors and ropes. Whether it be tooling or moulding materials or specialised components, we can supply most products quickly and competitively.

The list includes the following:-

Polyurethane Twinpacks

Cable Grips

Hair Fairing

Ropes, Thimbles and Shackles

Mould Tools

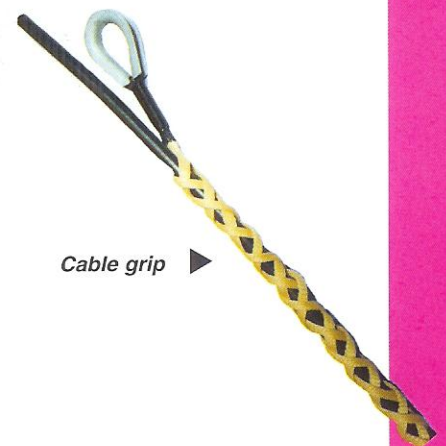

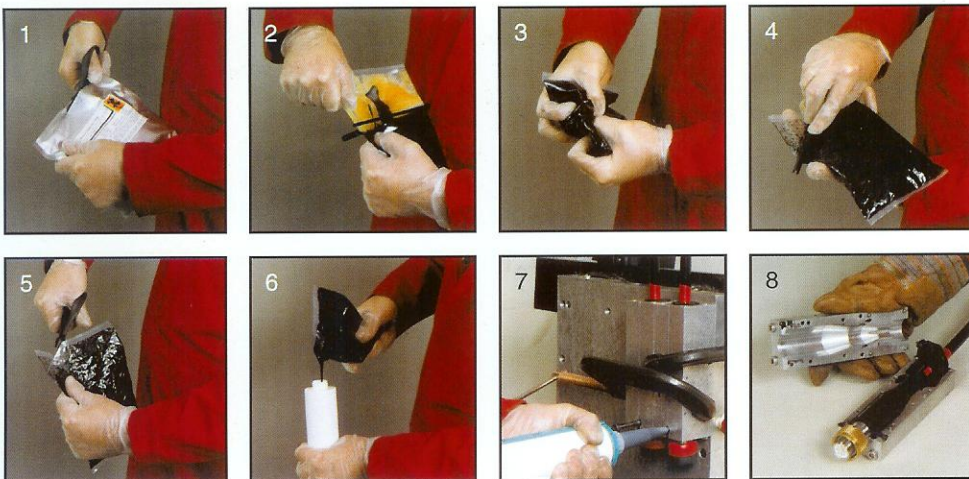

Wire Capping Resin

Battery Packs

Cable Drums & Winches etc

We are keen to work closely with customers to supply complete cable packages including all necessary connectors, terminations, junction boxes and handling equipment etc. However, we are equally happy to supply components to customers wishing to undertake their own terminations.

Polyurethane Twinpacks

Cable grip

Mixing Instructions - Please read these instructions carefully before opening a Twinpack.

1. Carefully remove the resin pack from outer pack. Remove end caps if fitted.
2. Remove the centre clips separating the resin and hardener, by holding the pack at each end and pulling outwards gently until the clip springs off, forming one complete bag.
3. Gripping the ends of the pack, manipulate the resinpack vigorously with a circular motion for at least 2 minutes.
4. Place the resinpack on a smooth, flat surface and using the centre section of the removed clip, scrape any unmixed resin or hardener from each corner of the pack into the centre. Manipulate the resinpack in your hands for a further 1 minute or until uniform.
5. Cut off a small corner of the resinpack.
6. Hold the resinpack and pour into injection cartridge or mould tool.
7. Inject into mould tool.
8. Remove termination from mould tool when cured.

WARNING: Always wear protective clothing.

Available in a choice of hardnesses and pack sizes
